

## Behind the Crystal Ball

Magic, Science, and the Occult  
From Antiquity Through the New  
Age, Revised Edition

By Anthony Aveni

In this fascinating exploration of occult practice, Anthony Aveni takes the reader on a whirlwind tour through time and space to unveil the many ways people have used magic over the millennia in hopes of improving their lives. As Aveni persuasively argues, the ancients sought what we now search for through science and religion—a clearer picture of humanity's place in the cosmos.

*"For readers intrigued by the social contexts*

*of such obscure quackery as hepatoscopy (divination of portents found in livers), [Aveni] crafts an engaging set of stories."*—Booklist

Anthony Aveni has pioneered the study of astronomical anthropology and archaeo-astronomy. The Russell B. Colgate Professor of Astronomy and Anthropology at Colgate University, he was voted 1982 Professor the Year by the Council for the Advancement and Support of Education and in 1991 was named by *Rolling Stone* one of America's top ten college professors.

*"[Mr. Aveni]'s not out to debunk . . . occult practices. Just the opposite: he argues that magic has had a bum rap through history . . . that 'deep down science and magic are perhaps more alike than we might care to admit.'"*
